Question No. 106

In the given figure there are
21 triangles and
17 parallelograms.

**The difference between the
number of triangles and
the number of parallelograms is four**

PAGE - 2

There is one main figure (ABCDEFGH).

Total number of triangles in the main figure is shown separately. These triangles can be identified by their symbolic name as well as approximate size, shape and dimensions.

There is one main figure (ABCDEFGHA). Total number of parallelograms in the main figure is shown separately. These parallelograms can be identified by their symbolic name as well as approximate size, shape and dimensions.
